

## Giacomini Underfloor Heating Systems gain European 'Agreement' Certification

Following extensive testing and evaluation by IKE, the Institut für Kennenergetik und Energiesysteme at Stuttgart University, Giacomini has received 'Agreement' Certification that their underfloor heating systems meet the 'thermal output requirements of floor heating systems in accordance with DIN EN 1264-2 and DIN 4725-4'.

IKE is a leading European centre for the testing and evaluation of heating products and awards test report certificates to those meeting the required performance requirements. It has long experience in the field of thermo-physical properties and radiation thermometry as documented by many publications and its participation in a large number of EU projects. The certification process is widely recognised throughout Europe and is equivalent to the BBA (British Board of Agreement) system in the UK.

The full test report (7 pages and 2 appendix pages) is available from Giacomini on request.

# A World Leader in Underfloor Heating Systems

For all his aspirations, even Albert Giacomini did not envisage quite the success achieved by Giacomini s.p.a. when he first established the company in 1951 on the western side of Lake Orta, Italy. Expanding rapidly beyond his original dreams, his first small manufacturing unit has now grown into a world leader, renowned for its design flair and engineering ingenuity.

Originally making its name in the brassware sectors with highly innovative lever ball, gate and radiator valves, Giacomini is now a byword for both components and complete comfort systems for all types of buildings.

- Family owned business established in 1951 by the Giacomini family in Italy.
- One of Europe's largest manufacturers, with a turnover in excess of £250m, exporting to over 100 countries worldwide.
- Over 30 years experience in underfloor heating, from manufacturing to design and installation.
- Single point responsibility for the whole system, including screed if required.
- We manufacture all components to ensure quality, reliability and supply.
- Full technical assistance is available at every stage from experienced UK based engineers.
- Up to 50 years guarantee on all pipework.
- Up to 10 years guarantee on all brass components.

Giacomini Plastics Factory, San Maurizio.

Giacomini s.p.a Headquarters, Italy.
